28 MAY 1968

MEMORANDUM FOR: Deputy Director for Support

SUBJECT : O'Boyle Letter to DCI dated 21 May (attached)

1. I telephoned Mr. O'Boyle at 1620 hours on 28 May stating that I was calling for the Director to whom Mr. O'Boyle had addressed a letter on 21 May asking about a high speed facsimile device.

2. Mr. O'Boyle immediately acknowledged the letter and stated that he was simply trying to determine if we had something very special which had not been brought to his attention earlier. I explained to Mr. O'Boyle that the article referred to the LDX and suggested that perhaps Mr. O'Boyle was aware of the LDX System. He confirmed that he knew of the LDX System but thought that perhaps we had something else new and different. I assured him that this was not the case and gave him the name of Mr. Bert Stafford, National Communications System Staff, as a person with whom he might wish to discuss secure facsimile techniques and systems. Mr. O'Boyle thanked me for the call.

STAT

Director of Communications
